

The Agency Automation Blueprint

Automate intake, scheduling, and client follow-up so your team can focus on billable work.

The agency leak

Agencies lose revenue in three places: slow intake responses, missed discovery calls, and inconsistent follow-up. When a founder fills out your form and waits 24 hours for a reply, they have already talked to two competitors.

What the AI agent handles

- * Qualifies prospects through chat or voice.
- * Books discovery calls directly on your calendar.
- * Sends proposal follow-ups automatically.
- * Answers common questions about services and pricing.
- * Alerts account leads when high-intent prospects engage.

Turn forms into conversations

Replace static contact forms with an AI concierge that engages visitors in real time. The agent collects the same information but in a natural conversation, then routes hot leads instantly.

Pricing

- * Starter Agent: \$199/month.
- * Growth Agent System: \$399/month for connected intake, follow-up, and scheduling agents.
- * Synthetic Intelligence OS: \$1,500/month for full AI department capabilities.

Next step

Enter the Lab for \$19 to identify your biggest automation opportunity, or book the Assessment to build your agent stack.
